

Noise In Our Ears

LET me express my views in connection with the newly-formed party (Congress of Democrats).

I am not against the party's formation, but I am against some of its members who are making noise in our ears. Why can't they resign and go to the party they think is right for them without making any noise or accusing their previous political parties of failing to do as they promised. That is immature and very childish if not abnormal behaviour.

It is their right, I know that, but I don't think they must use bad language against the Swapo party, a party that brought peace in this country. They should go quietly without making any unfounded allegations towards our party. Do they just want money or think that they will may be promoted to higher ranks should the new party win?

I know that is not my business, but I think I have to ask the question as many people are joining that party.

Politically, it is always very easy to make stories or tell people lies about something very new, like a political party. I think many people really need orientation when it comes to political issues.

Fellow Namibians let us not be disunited by the myths spread by politicians and let show these false leaders that we didn't struggle to be misguided and disunited. It is painful and we really must avoid and be careful of those who brought war and apartheid to our country.

They must not be allowed to destabilise our peace so that they can once again take over.
