

# Queries On NBC 'Blackouts'

I CONSIDER myself an updated person, therefore I like listening to NBC news and other current affairs. But the words 'this interruption is receiving our attention - please stay tuned' is really putting me off. If they are saying that there is no money to replace the old equipment they have at their disposal, what happens to the money they got from the state? Imagine the President was giving a speech to the nation and it was disrupted. It is no

wonder that heads are to roll at the financially stricken corporation. Maybe it will ring changes to the people who are misusing the corporation's funds. We are very tired of seeing all the taxpayers' money go to waste - which means that they are just going down the drain and that drain is some selfish officials who are not thinking for the nation at large.
