

Unite!

DEAREST fellow countrymen and women, I urge you to unite and support your movement Swapo to the fullest extent, no matter what the enemy of our people may think.

This moment is a threshold to the implementation of Resolution 435 and subsequently to the independence of our country. Namibians, like any other nation, must show their unity, to fight hard in order to eliminate colonialism and slavery as well as racial discrimination and exploitation of man by man in our land. Our people should be on the look-out for the enemy's tactics of disuniting us.

We must stand firm on our way to freedom without wavering. We do not have to let ourselves be stooges where the enemy of our people can use us to fight against our own people and freedom of our country.

The racist government has so many plans and tricks for destabilisation. We must be prepared to defend our would be sovereignty and hard-won independence. We must not allow banditry to take place in our free Namibia.

We must be prepared to develop our country in order to have enough food for our people, enough shelters and good communication systems throughout the land. Peace must prevail in our land after our independence.

We have to live together as children of this beloved land Namibia. We must also be prepared for hard moments ahead of us. The racists in Pretoria have never been honest and cannot be trusted. We have seen the horrors they are causing in our country until today.

Many lives have been lost, many people have gone missing without trace, many families have become childless and many children have become orphans. All such horrific and barbaric acts are committed by the racists and their followers.

Beloved nation, we have languished for too long in the hands of apartheid and colonialism, so let us break the barriers of tribalism and regionalism. Let us be prepared to build a non-racial and democratic government under

Swapo of Namibia. Peace-loving nations are proud of us because of our bravery that we have demonstrated, and continue to demonstrate, to our enemy.
