# Karibib complaints

---

I AM CALLING on the socalled interim government to direct their attention to the following:

We, the people of Karibib, are sick and tired of *baasskap* by the whites. We cannot accept everything the white man tells us.

We are sick and tired of toilet pots which are carried out by our people in the black township. It is a health hazard to both the carriers and the local people.

Lots of diseases are caused by this. We want the same toilets as those used by the white man. We want flush toilets.

Karirib is one of the oldest places in Namibia but it is not developed. The houses are old and in a state of collapse. Taps are closed down and one has to walk a distance to get water. White people are notified if there are problems with water supplies, but black people are not notified.

Why must we suffer like this? Why must another human being with a different skin colour be superior?

I seriously request the interim government to use the taxpayer's money in a proper way. See that Karibib is rid of these intolerable socalled facilities. Open a high school in Karibib, and let the Municipality build new houses and paint the old ones.

ERNST EIRAB  
KARIBIB
