

# A vast distinction

I CRITICISE and seriously condemn the attitude of some Caprivians towards their fellow citizens. The Namibian newspaper is not there for criticising fellow citizens. If you don't have something relevant to be published, don't waste the paper you're writing on.

It would be better for Caprivians to concentrate and improve the Administration in the area. We all want independence, but people who betray and condemn will never give us independence.

We must live in peace so that the Lord will give us better ways in which to solve our problems and which will lead us to independence.

At present Caprivi is separated in two sections. What causes this? In the first place, tribal politics, in the second place, lack of foresight and in the third, money.

We say whites discriminate against us. This is true if we associate with their customs. We discriminate against ourselves by adopting tribalism.
