

# Can The PM Explain?

I AM sixteen years old in grade 10 but I am very interested in politics as my wish is to become a politician.

I know that when I go to Edumeds to buy my text books there is always VAT on the price which means I am also paying tax to the government in order to enable the government to help develop this country or to help citizens like the people of Caprivi that are in emergency situation.

But I am shocked to hear that the Prime Minister uses our tax money to go and campaign for his party at the expense of all other Namibians. He went to see the Caprivi victims but at the same time told them to vote for Swapo. These poor people came to hear what the government is going to do about their situation but he took advantage of this opportunity to campaign for his party.

I have read this in *The Namibian* of April 27, 2004 in the statement of NSHR

but I am not sure if this is correct, can Prime Minister Gurirab confirm or deny these allegations because to me this is a corrupt practice.

Can he please publicly confirm or deny.
