

At a standstill

I SHED tears to see the economy, progress and education in the Caprivi coming to a standstill because of Dr J A G du Plessis, head of the Interdepartmental Committee for the area.

He appears to have no definite plans for developing the Caprivi.

☐ On Education, he has signed a contract with the Academy to run so-called formal education in the Caprivi and has done away with LPTC, PTC and JSTC courses, which were better than ECP;

☐ Water costs have been raised to 58c per kilolitre;

☐ there is no electricity in the houses of blacks;

☐ no housing allowances for workers in Administration houses;

☐ rentals have been raised;

☐ taxes and raised and increased in number and include Caprivi tax, Levy tax, General tax, mail tax, Pay As You Earn, and Sales Tax.

The situation should be reviewed.
