

Approve Monies To Save GRN Structures

IT is indisputable that nowadays Government infrastructure e.g. school hostels, hospital wards, military bungalows etc. are in ruins due to vandalism or just because of age or because maintenance is lacking. If one asks any relevant

officer the reason the answer will be "no money".

I suggest that parliament should pass a law which will approve money to maintain our new and old infrastructure.

History has taught us

that if one builds infrastructure, one ought to be ready for the maintenance if development is the priority of priorities and for the taxpayers' efforts not to be in vain.
